Wielfried Zouantcha

Senior Full-Stack Engineer | Applied AI & Automation

Remote | zouantchaw74@gmail.com | zouantcha.com | LinkedIn | GitHub

SUMMARY

Senior full-stack engineer with 5+ years shipping SaaS products, integrations and customer-facing software. Owns delivery from requirements and data models through APIs, interfaces and cloud deployment. Builds applied-AI systems with LLM integrations, retrieval, model evaluation and recoverable automation.

TECHNICAL SKILLS

Languages & frameworks: TypeScript, JavaScript, React, Next.js, Node.js, Python, SQL

Applied AI: LLM integrations, AI agents, tool calling, RAG, embeddings, semantic/visual search, model evaluation, human review; AI SDK

Data & APIs: PostgreSQL, Prisma, Firebase, REST APIs, webhooks, Stripe, Shopify, authentication/authorization

Cloud & automation: Cloudflare Workers, D1, R2, Vectorize, Workers AI, AI Gateway, Queues; Google Cloud Run, Azure

Testing & delivery: Playwright, Vitest, integration testing, Git/GitHub, production debugging

SELECTED PROJECTS

PortMind | 2026 - Present

Computer-vision research, model evaluation and human-review tools

Public research and results

- Published a six-model comparison on 96 Montreal port-camera images (v1.0, September 2026), separating truck detection, container attachment, false alarms and uncertain answers.
- Built Python CLI tooling over 81,202 activity snapshots from six cameras, with versioned manifests, labeling and evaluation workflows, and recoverable background jobs using Cloudflare Queues and retries.
- Built a React annotation app with original-pixel boxes and revision history; integrated Moondream detection and Llama Scout coaching through Workers AI and AI Gateway with explicit human approval.

MTL Archives | 2025 - Present

Public archive search, data pipelines and applied AI

Public archive and search

- Built a Next.js and Cloudflare product serving 13,499 Montreal archive records, with BGE-M3/CLIP embeddings and Vectorize for semantic and visual search, a daily game and Stripe checkout.
- Shipped bilingual retrieval-augmented generation (RAG) search using AI SDK agents and tool calling, Mistral on Workers AI, bounded image inspection, source citations and daily inference quotas.
- Built Python/TypeScript ingestion, offline OCR and captioning pipelines; automated editorial and newsletter workflows; built React review tools preserving human edits and showing AI suggestions after human saves.

EXPERIENCE

Oloodi Technologies / KROW Workforce

Full-Stack & Customer Engineer (Contract) | Jan 2026 - Oct 2026

- Developed React/TypeScript interfaces and Node.js services for onboarding, shifts, timesheets and invoicing on Firebase, PostgreSQL and Google Cloud Run.
- Strengthened authorization, validation and integration checks; ran critical-flow QA to troubleshoot production behavior before releases.
- Delivered product demonstrations to teams at Snapchat, Google, EA Sports and NVIDIA; translated customer questions and feedback into implementation priorities.

Independent Consulting

Software Engineer / Product Consultant (part-time) | Jan 2023 - Present

- Diane Party Rentals: scoped requirements with business owners and built quoting, inventory-locking, booking and Stripe payment workflows connecting checkout to rental operations.
- Ballerz Football Academy: built scheduling, booking and parent/admin workflows with Next.js, Cal.com and Stripe, including payment and calendar recovery states.

Ethos / HeyEthos

Senior Full-Stack Engineer / Product Engineer | May 2022 - Nov 2025

- Owned multi-tenant Shopify storefront, point-of-sale, loyalty, onboarding and billing features from Prisma data models and Node.js APIs to React/Next.js interfaces on Azure.
- Hardened multi-tenant security with merchant isolation, authentication and authorization fixes, webhook HMAC validation, server-side app proxy routes, and safer cart/session handling.
- Translated product requirements into merchant dashboards and internal REST APIs for Flow and Ethereum; handled production debugging and iteration with product and customer-facing teams.

SaaS Alerts

Software Engineer, Integrations & Security | Oct 2020 - Dec 2021

- Integrated security events from Microsoft Graph, IT Glue, Datto, ConnectWise and Kaseya into shared alerting workflows; inspected API payloads and Kibana logs to identify missing signals and integration limitations.

EDUCATION

Flatiron School | Full Stack Software Engineering Certificate
